

PRESS RELEASE OCTOBER 16, 2018

# Ovzon signs agreement with SpaceX for first satellite launch

**In an important step towards growing its satellite service offering, Ovzon has entered into an agreement with SpaceX for launch of Ovzon's first GEO satellite. The launch is expected to take place no earlier than Q4 2020. The next step for the company is to finalize the procurement of the satellites.**

Per Wahlberg, CEO Ovzon said; "Contracting the launch supplier of our first Ovzon satellite is an important and exciting step for our company. SpaceX offered a very competitive solution with the Falcon Heavy launch vehicle which will gain us access to space in a timely and reliable manner. The satellite is expected to be launched no earlier than Q4 2020. The procurement of the satellites is now also in the final stage. Earlier this month we ordered and started the manufacturing of the first Ovzon On-Board-Processor (OBP), one of the most advanced of its type. We therefore continue to work towards our goal of revolutionizing mobile broadband via satellite by offering the highest data-rates through the smallest terminals".

"We are honored that Ovzon has chosen SpaceX to launch the first of its satellites," said SpaceX's President and COO, Gwynne Shotwell. "We look forward to working closely on the execution of this important direct-to-GEO mission."

The agreement is subject to certain contingencies and mutual termination clauses.
