Ovzon expands distributor network

Ovzon is expanding its distributor network and teams up with Network Innovations in Benelux, Bansat in Colombia and Orbita in Peru.

Ovzon has signed distributor agreements with Network Innovations in the Netherlands for the Benelux region, with Bansat in Colombia and with Orbita in Peru. Those distributors join Ovzon's growing partner network, selling Ovzon's innovative satellite communication services.

The distributors and Ovzon will together market Ovzon's services based on leased capacity paired with Ovzon's mobile terminals and efficient, reliable support. From 2021 the offering will be expanded with capacity from Ovzon's first own satellite, Ovzon 3.

Ovzon-3 is an important step to further revolutionize mobile broadband via satellite, offering the highest bandwidth with the smallest terminals. Ovzon 3 is the first of a number of satellites planned for global coverage of Ovzon's high-end service.

"We are excited to team up with Network Innovations, Bansat and Orbita. Working with established and reputed partners, well connected on their respective markets helps us expand efficiently. Our new partners professional teams will help us supply our innovative satellite-based communication services to demanding customers." says Magnus René, CEO of Ovzon.

FNCA Sweden AB, +46(0)8-528 00 399, info@fnca.se, is the company's Certified Adviser.
