## Ovzon appoints FGH Security distributor in France

Ovzon has signed a distributor agreement with FGH Security, in which FGH will represent and sell Ovzon's innovative satellite communication services in France.

Ovzon and FGH will together market Ovzon's services based on leased capacity, steerable beams, Ovzon's mobile terminals and efficient, reliable support. Ovzon's current service offering will be significantly expanded with Ovzon's new satellite, Ovzon 3, launched in 2021. Ovzon 3 will provide dramatically enhanced performance and functionality and is an important step to further revolutionize mobile broadband by GEO satellites, offering the highest bandwidth with the smallest terminals. Ovzon 3 is the first of a number of satellites planned for Ovzon's high-end, global service.

Since 2003, FGH has specialized in providing innovative Intelligence (ISTAR) and Communication (C5) solutions to government agencies in France. It includes covert Audio/Video/Tracking systems, Unattended Ground Sensors and high throughput Tactical Communication solutions for fixed or mobile surveillance. FGH provides comprehensive technical assistance and support to operational end users.

"We are excited to team up with FGH on the French market. FGH and their professional team has a long history and legacy supplying satellite-based communication services to demanding customers." says Magnus René, CEO of Ovzon.

"We are very proud adding Ovzon's service with exceptional mobile terminals and high throughput to complement our present offering." says Nathalie Gerard, CEO of FGH Security.
