# Ovzon receives 1.1 MUSD order from UK MoD for renewal of SATCOM-as-a-Service

Ovzon has received an order for the renewal of Ovzon's SATCOM-as-a-Service from the UK MoD through the company's partner Airbus. The 18-month renewal, valued at 1.1 MUSD, will start on September 1, 2022, and represents an extension of Ovzon's services in specific regions of the world.

Ovzon's SATCOM-as-a-Service provides unprecedented levels of performance, mobility and reliability that are unmatched in the industry.

This renewal does not include all critical SATCOM-as-a-Service solutions provided by Ovzon to the UK Government, which are expected to be renewed later in 2022.

“As the security situation in Europe continues to evolve, secure, mobile, highspeed satellite communications will become even more critical for command-and-control centers, delivering sensor data, and most importantly senior leader assured communications. The UK MoD's long-term renewal of Ovzon services is a testament to how important guaranteed communications are to national security in the region. With the launch of Ovzon's first own satellite, Ovzon 3, later this year we will be able to deliver industry leading throughput, security, and resiliency to not just the UK, but to all NATO Nations who need the most reliable and secure SATCOM-as-a-Service solutions in the world”, says Per Norén, CEO of Ovzon.
