

Press release February 24, 2023

Ovzon selected as top 10 hottest companies in the satellite industry

The satellite industry's prominent news and expert business analysis provider Via Satellite, has selected Ovzon as one of the top 10 hottest companies in the satellite industry.

For the fifth year, Via Satellite's 10 Hottest Companies list highlights the "must watch" companies providing satellite communications, ground systems, manufacturing, imagery, sensing, and launch services. Via Satellite editors chose the companies on this list based on their expected activity for the year, and a mix of market share, transformational technology, ground-breaking deals, and overall industry excitement.

Via Satellite editors lift Ovzon's growth, uniqueness, and value increase: "Ovzon stands out in the crowd of European space companies thanks to a multi-layered strategy bundling its satellite capacity and terminals together in SATCOM-as-a-Service. The combination of its own satellites, terminals, and its SATCOM-as-a-Service offering is one of the most exciting components of its strategy. The company wants to become the de-facto standard for SATCOM-as-a-Service for organizations with critical missions and demanding requirements."

Per Norén CEO of Ovzon comments: "We are honored to be selected as one of the hottest companies in the industry. This is a reward for all the hard work of our employees who have transformed Ovzon and taken us to where we are today. It is a boost to our company in our continuous drive to add value to our customers and deliver on our vision: Connecting the world's critical missions via satellite."
