Ovzon expands its offering with partner Nigma Conseil through a follow-up order

Ovzon expands its On-the-Move (OTM) SATCOM-as-a-Service offering with the partner Nigma Conseil through an initial order at a value of MUS\$ 0.6. The order includes both industry leading OTM terminals and dedicated solutions development and support.

Ovzon received its first order from Nigma Conseil in December 2022 with an order value of MUS\$ 1. This follow-up order demonstrates Nigma's dedication as a valued partner in bringing Ovzon solutions to customers with demanding and critical missions. The deliveries contain the newest variants of Ovzon's OTM terminals, including technology and hardware from both Getsat and Skycomm.

Ovzon is working with Nigma to expand and develop an agile On-The-Move SATCOM-as-a-Service to a variety of mission-critical unmanned platforms for Intelligence, Surveillance, and Reconnaissance (ISR) missions.

"Because of Ovzon's high reliability, mobility, and data throughput performance, the Intelligence, Surveillance, and Reconnaissance (ISR) market segment is a clear target for us. We are continuously improving and expanding our product and services portfolio into value-added solutions to meet our end-customer needs for unmanned missions" says Ovzon's CEO, Per Norén.
